

Carlos Valdez

Full Stack Developer

Irvine CA 92697 | (760) 237-9360 | calejvaldez@gmail.com | [LinkedIn](#)

Work Experience

Full Stack Developer

October 2023 - Present

Ojos Project

- Led development of Iris, an open-source cross-platform caregiving tool built with Rust and Next.js; coordinated with distributed team and engineers to deliver core features
- Conducted requirements analysis and literature review to inform feature design and ensure best practices in caregiving software
- Implemented Scrum workflow through sprint planning, GitHub issue tracking, and sprint reviews, ensuring the team is aligned
- Presented regular project updates to faculty advisors, securing timely feedback and maintaining stakeholder engagement
- Reported any issues with the software with team and stakeholders, improving communication and planning

Frontend Developer

April 2023 - January 2024

Black Swan 3D Printing

- Deployed a Next.js-based website, integrating branding, services, and social media pages to support business outreach
- Managed sprint planning, GitHub issue tracking, and release workflows

Education

University of California, Irvine

June 2025

B.S., Informatics

- **Activities:** Designed 2 projects with Design at UCI Project Teams; initiated Iris through the Undergraduate Research Lab
- **Coursework:** Project in Human-Computer Interaction, Project in User-Interaction Software; Requirements Analysis & Engineering
